Professional Summary

UI/UX and web development professional with a background in Applied Physics and Computer Science. Experienced in designing and improving digital interfaces, websites and internal platforms. My work includes user interface design, web development, usability and quality testing, accessibility and responsive design. I have worked with private companies, freelance clients and United Nations organizations, including OHCHR and UNICC. I am particularly interested in human-centered design and creating digital products that are clear, accessible and easy to use.

Professional Background

UI/UX Digital Design Specialist
United Nations International Computing Centre (UNICC) | July 2026 – Present

- Design user-friendly interfaces and prototypes for United Nations digital platform.
- Work with different teams to turn project requirements into wireframes, prototypes and design systems using Figma.
- Support accessibility and consistency across digital products.
- Review and improve user journeys and interface workflows while taking part in design reviews and work with technical teams to support the development of digital solutions.

Web Designer & Developer - IT Intern
UN Secretariat (OHCHR) –Geneva/Remote | January 2026 – July 2026

- Supported the design and improvement of internal digital platforms, including the Human Rights Council Extranet and self-service portals.
- Created interface designs, prototypes, web graphics and digital content.
- Tested digital platforms and reported issues to support improvements in usability and functionality.
- Worked with colleagues from different teams on digital projects and user interface improvements.
- Created demonstrations and documentation to support users and platform onboarding.

Full-Stack Web Developer and UI/UX Designer
Self-Employed / Freelance | Kenya | July 2024 – November 2025

- Designed and developed websites and digital products for clients in property, healthcare, education, entertainment and other industries.
- Worked on e-commerce websites, learning management systems, corporate websites and other digital platforms.
- Managed projects from early discussions and planning through design, development, testing and delivery while working with the clients to understand their requirements and create solutions suited to their users and business needs.
- Provided website maintenance, updates and technical support after project is delivered.
  Selected projects include but not limited to: Keja Kijani, Honda University LMS, Keyword Ventures, Logistics Board, Riannu Entertainment, and Meditest/4SL Healthcare.

Web Developer & Designer

Jujaya Media | March 2024 - June 2024

- Designed and developed WordPress websites for clients while improving website layouts, navigation and mobile usability to existing websites in need of revamping.
- Used feedback and testing to identify and fix usability issues and also tested websites across different browsers and devices.
- Worked with team members to meet project requirements and deadlines.

Additional Web Development and Design Internships
Internship Roles with Sparks Foundation, CodSoft, InternSavy, TechnoHacks EduTech, Bharat Intern

- Worked on web development and design projects using modern web technologies while supporting mobile-first optimization and low-bandwidth usability improvements to enhance digital access.
- Built responsive interfaces with a focus on usability while taking part in testing, documentation and improvements to digital projects.
- Gained experience working on individual and collaborative development.

Educational Background

BSc. Applied Physics and Computer Science
Multimedia University of Kenya | Second Class Upper Division (2018–2022)
Relevant areas of studies included but not limited to Computer Science, Physics, Computing Systems, and Telecommunications Applications and Software Engineering.

Software Engineering Fellow
ALX Africa | January 2023 - October 2024 | Top Performer Award
Completed software engineering training with a focus on web development, programming, collaborative development, version control and software projects.

Certifications

Effective Business Websites
HP LIFE | HP Foundation (2023)

Technical Skills

- **Web Development**: HTML, CSS, JavaScript, React, responsive and mobile-first web development.
- **Content Management Systems:** Drupal, WordPress, WooCommerce.
- **UI/UX Design & Prototyping:** Figma, wireframing, prototyping, user interface design, design systems.
- **QA & Compliance:** Functional testing, usability testing, responsive testing, cross-browser testing, WCAG 2.1 AA and W3C accessibility principles.
- **Tools and Collaboration**: Git/GitHub, Agile and Scrum Collaboration, Documentation, Stakeholder Coordination, Systems Optimization.

Areas of Interest

Human-Computer Interaction, User Experience Design, Human-Centered Design, Accessibility, Inclusive Technology, Digital Product Design and Web Development.
